MERITUM24.PL

ABOUT US

Manufacturer from south-east Poland

We design and manufacture display stands, shop shelving, heat pump and air conditioner enclosures, and custom metal parts.

We started out as a small family business. Today we run our own production and storage halls in Ziempińów, with an experienced team and regular clients, including well-known brands and retail chains. Design, prototype and series production all happen under one roof.

Materials and finish

Solid steel, powder coating and careful finishing at a fair price.

Long-term partnerships

Many clients come back to us with repeat runs and new projects.

Displays that sell

We design so the product is easy to see and easy to reach.

New solutions

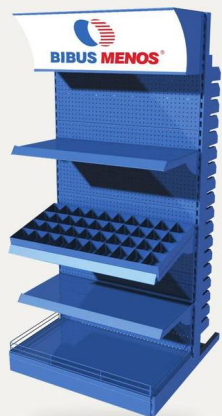

We follow retail and technology trends and bring them into our designs.

Meritum24 plant in Ziempińów

What we can make for you

We make one-offs, prototypes and large series. We work from your design or develop one from scratch based on a description, sketch or photo.

Display stands and racks

Powder-coated POS displays and shop shelving in your brand colours and graphics.

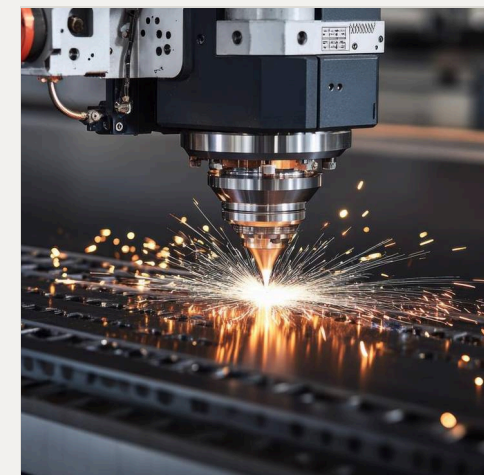

MDF and plywood stands

Structures combining wood with metal and plastics, for shops and trade fairs.

Heat pump and air conditioner enclosures

Made-to-measure covers for homes, offices, hotels and restaurants, in a colour of your choice.

Contract metalwork

Laser cutting, bending, welding and powder coating to your drawings.

DISPLAY STANDS AND SHELVING

Your product in the spotlight

Displays for small shops, supermarkets, showrooms, offices and service points.

Our shop shelving is made of metal and powder coated. It is certified for strength and safe use, and suitable for contact with food. We adapt dimensions, colours, shelves, hooks and graphics to your range and the space in store.

Drugstores and perfumeries

Stands for cosmetics and testers.

Electronics and tools

Shelving and pegboard walls for showrooms.

Bookshops and supermarkets

Displays for newspapers, books and catalogues.

Food brands

Dedicated POS shelving with brand graphics.

Display stands

Displays with hooks, wire mesh and pegboard panels

HEAT PUMP AND AIR CONDITIONER ENCLOSURES

Custom-fit enclosures

An enclosure protects the outdoor unit from snow, hail, leaves and damage, and keeps the facade and garden looking tidy.

We make them from laser-cut, bent sheet steel, powder coated in the colour you choose. Single units for property owners and series for installers.

Houses and apartment buildings

A neater facade and a better protected unit.

Offices and commercial buildings

A modern look that fits the architecture.

Hotels and restaurants

Discreet AC housings raise the standard of the venue.

ENCLOSURES

Built around your unit

We design each enclosure for a specific heat pump or air conditioner model, keeping airflow and service access intact.

Material	sheet steel
Finish	powder coating
Colour	your choice
Dimensions	made to order
Quantity	from one unit

MACHINERY

Everything in one plant

We cut sheet metal on TRUMPF fibre lasers, bend it on press brakes, then weld and powder coat it. We also have plastics and printing equipment, so a display combining metal, plastic and graphics is made in one place.

Sheet metal

Housings, shelves, pegboard panels. **TRUMPF fibre lasers, punching machines, press brakes**

Tubes and profiles

Frames and load-bearing structures. **CNC bender, welding**

Plastics

Dividers, toppers, guards. **Cutting plotters, thermoforming machine**

Wire

Hooks, pegs and baskets. **CNC wire benders**

Powder coating

A durable finish in the colour you choose. **In-house powder booths**

Graphics and branding

Prints with your brand logo. **Solvent plotters**

SERVICES

Custom metal parts

Have your own drawings? We also offer laser cutting, bending, welding, tube and profile processing and powder coating as a service for other companies.

We prepare the cutting program from a drawing or CAD file and reuse it for repeat orders. We also make counters, furniture and fittings in metal.

SAMSUNG

HOW WE WORK

Briefing

We learn about the product, the display location, quantity and deadline.

Design

We prepare a 2D design and suggest improvements.

Prototype

We build a sample for your approval.

Production

The series is made in our plant, matching the prototype.

Delivery

We pack and ship the finished products.

Let's talk about your project

Tell us what you need: the product, quantity and deadline. You can attach a sketch or photo. We will reply with a proposed solution and a quote.
