Display stands, shelving and enclosures in metal

Display stands and shelving | MDF and plywood stands | Heat pump enclosures | Metalworking

MERITUM24.PL

ABOUT US

A manufacturer from south-east Poland

We design and manufacture advertising display stands, retail shelving, heat pump and air conditioner enclosures, and custom metal components.

We started as a small family business. Today we have our own production and storage halls in Ziempniów, an experienced team and regular clients, including well-known brands and retail chains. Design, prototype and series production all happen under one roof.

Materials and workmanship

Solid steel, powder coating and careful finishing at a reasonable price.

Displays that sell

We design so that the product is clearly visible and easy to reach.

Long-term partnership

Many clients come back to us with new series and new projects.

New solutions

We follow trends in retail and technology and bring them into our projects.

OUR OFFER

What we can do for you

We make one-offs, prototypes and large series. We work from your design or develop one from scratch based on a description, sketch or photo.

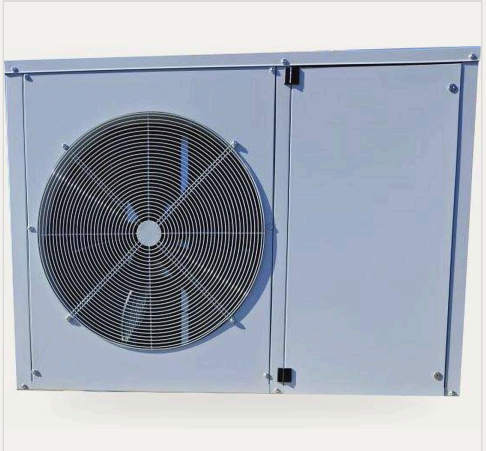

Display stands and shelving

Powder-coated POS displays and retail shelving with graphics and brand colours.

MDF and plywood stands

Structures combining wood with metal and plastics, for shops and trade fairs.

Heat pump and air conditioner enclosures

Made-to-measure covers for homes, offices, hotels and restaurants, in the colour of your choice.

Contract metalworking

Laser cutting, bending, welding and powder coating to your drawings.

DISPLAY STANDS AND RETAIL SHELVING

Your product in the spotlight

Displays for small shops, supermarkets, showrooms, offices and service outlets.

Our retail shelving is made of metal and powder coated. It is certified for strength and safe use and is suitable for contact with food. Dimensions, colours, shelves, hooks and graphics are tailored to your product range and the space in the shop.

Drugstores and perfumeries

Stands for cosmetics and testers.

Electronics and tools

Shelving and perforated walls for showrooms.

Bookshops and supermarkets

Displays for press, books and catalogues.

Food brands

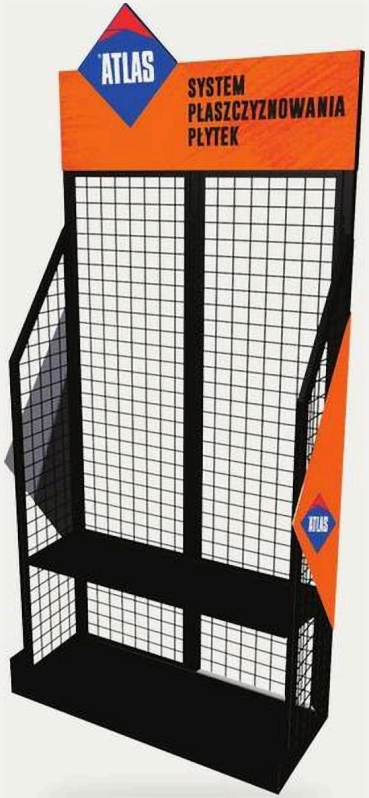

Dedicated POS shelving with brand graphics.

Display stands

Displays with hooks, mesh and perforated panels

Rotating hook display

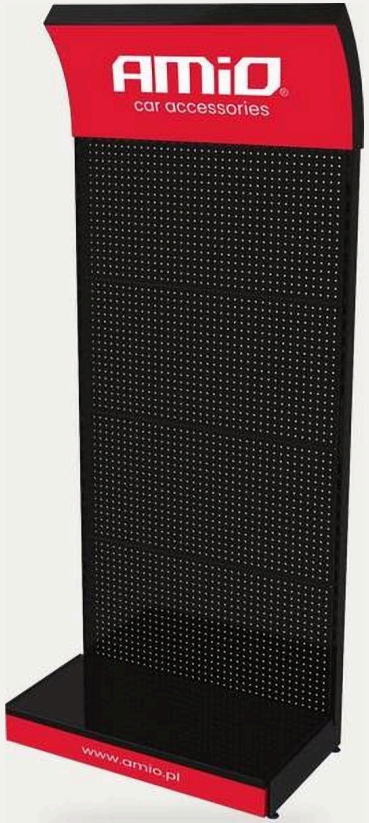

Mesh stand with shelf

ATLAS

POS projects

Counter displays, shelving and custom fit-outs

Shelving with baskets

STANLEY

Counter display

Shelving with light box

Display cabinet

Sample display

CERRAD

HEAT PUMP AND AIR CONDITIONER ENCLOSURES

Made-to-measure enclosures

An enclosure protects the outdoor unit from snow, hail, leaves and damage, and tidies up the façade and garden at the same time.

We make them from laser-cut, bent sheet metal, powder coated in the colour of your choice. Single units for homeowners and series for installers.

Houses and apartment buildings

A nicer façade and better-protected equipment.

Offices and commercial buildings

A modern look that matches the building's architecture.

Hotels and restaurants

Discreet air-conditioning housing raises the standard of the venue.

ENCLOSURES

Fitted to your unit

We design the enclosure for a specific heat pump or air conditioner model, keeping full airflow and service access.

Material	**sheet steel**
Finish	**powder coating**
Colour	**your choice**
Dimensions	**made to order**
Quantity	**from one unit**

MACHINE PARK

Everything in one plant

We cut sheet metal on TRUMPF fibre lasers, bend it on press brakes, weld and powder coat it. We also have machines for plastics and printing, so a display combining metal, plastic and graphics is made in one place.

Sheet metal

Enclosures, shelves, perforated panels. **TRUMPF fibre lasers, punching machines, press brakes**

Tubes and profiles

Frames and load-bearing structures. **CNC tube bender, welding**

Plastics

Dividers, toppers, guards. **Cutting plotters, thermoforming machine**

Wire

Hooks, hangers and baskets. **CNC wire benders**

Powder coating

Durable coating in the colour of your choice. **In-house powder booths**

Graphics and signage

Prints with the brand logo. **Solvent plotters**

SERVICES

Custom metal components

Have your own drawings? We also offer laser cutting, bending, welding, tube and profile processing and powder coating as a service for other companies.

We prepare the cutting program from a drawing or CAD file and reuse it for repeat orders. We also make counters, furniture and fittings in metal.

Cover with openwork pattern

Trolley table

Plant stand with wood

TRUSTED BY

We work for well-known brands

We have completed orders for brands in the food, electronics, tools and fuel sectors. We know how high such companies set the bar for quality.

HOW WE WORK

Consultation
We learn about the product, display location, quantity and deadline.

Design
We prepare a 2D design and suggest improvements.

Prototype
We make a sample for your approval.

Production
The series is made in our plant, matching the prototype.

Delivery
We pack and ship the finished products.

Let's talk about your project

Tell us what you need: product, quantity and deadline. You can attach a sketch or photo. We will reply with a proposed solution and a quote.
